

Hussein Kteish

Cybersecurity Researcher | Application Security

(961) 76626035 hseinkteish21@gmail.com – [Hussein Kteish](#) - [GitHub](#) – [Portfolio](#)

Cybersecurity Researcher with hands-on experience in web security, API security, OSINT, and vulnerability assessment. Strong background in full-stack development using Node.js, NestJS, PostgreSQL, and REST APIs, enabling deeper analysis of authentication, authorization, and application attack surfaces. Experienced with Burp Suite, Kali Linux, Nmap, and secure application workflows.

Skills

- Web Application Security | API Security | OWASP Top 10 | Vulnerability Assessment | OSINT | Penetration Testing | Secure SDLC | Detection Engineering.
- Burp Suite | Nmap | Metasploit | Wireshark | Gobuster | Hydra | Kali Linux | Postman.
- JavaScript | TypeScript | Python | PHP | React.js | Node.js | NestJS | Laravel | REST APIs | JWT Authentication.
- PostgreSQL | MongoDB | MySQL | Prisma ORM | Swagger | Jira | Docker | Git/GitHub | Postman.

Experience

Cybersecurity Researcher	Freelance	Beirut, Lebanon	2025 – Present
• Conducted hands-on web security labs and vulnerability analysis using TryHackMe and PortSwigger labs covering authentication flaws, IDOR, injections, and enumeration techniques. • Practiced exploitation and reconnaissance workflows using Burp Suite, Nmap, Metasploit, Gobuster, and Kali Linux. • Focused on web application security, attack surface analysis, and secure authentication mechanisms.			
Full-Stack Developer Intern	Areeba	Beirut, Lebanon	Feb – May 2026
• Collaborated on scalable API development using NestJS, TypeScript, PostgreSQL, Prisma ORM, Swagger UI, and Postman within Agile team workflows. • Worked on authentication flows, backend logic, API testing, and secure request handling in enterprise-grade applications. • Strengthened secure development and AppSec understanding through modern backend architecture and API integrations.			
Cybersecurity Ambassador	Semicolon Security	Beirut, Lebanon	2025 – Present
• Conduct cybersecurity workshops and technical awareness sessions for university students. • Support students in hands-on security practices, OSINT, and secure development concepts.			
Freelance Full-Stack Web Developer	SuperTech Solution	Beirut, Lebanon	2023 – Present
• Developed full-stack applications using React.js, Node.js, Laravel, MongoDB, and MySQL with secure authentication and REST API architectures. • Built practical experience in session handling, RBAC, validation, authorization, and backend security concepts.			

Projects

- Enterprise Bug Bounty Recon & Attack Surface Analysis (AT&T):**
- Designed reconnaissance workflows to enumerate public-facing assets, APIs, and endpoints using automated tooling and Burp Suite analysis.
 - Prioritized high-risk attack surfaces including IDOR, authentication, API, and file-access vectors through structured recon methodologies.
 - Built custom processing pipelines to optimize large-scale attack surface analysis and manual vulnerability research. [AT&T Report](#)
- Rooted - Secure MERN E-Commerce Platform:**
- Developed a full-stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB.
 - Implemented JWT authentication, RBAC authorization, and secure backend validation workflows.
 - Applied secure API and session management practices aligned with OWASP principles. [Rooted](#)
- Python Code Editor Web App:**
- Engineered a browser-based Python code editor using Laravel and React.js with authentication and role-based access controls.
 - Implemented backend protections for user isolation, file access restrictions, and controlled code execution workflows. [Code Editor](#)

Licenses & Certifications

- **Cybersecurity Specialist** [Semicolon Academy](#)
- **ISA - Information Security Associate** [Semicolon Academy](#)
- **Ethical Hacking Foundation** [Semicolon Academy](#)
- **Neural Network and Deep Learning** [Coursera](#)

Education

- Lebanese University - Beirut, Lebanon**
- Master’s in Cybersecurity (M1) | 2025 – Present
 - B.S. Computer Science & Applied Mathematics | 2022
